

Gabriel Souto

gsouto@andrew.cmu.edu | [linkedin.com/in/gnsouto](https://www.linkedin.com/in/gnsouto) | Pittsburgh, PA

EDUCATION

Carnegie Mellon University, Pittsburgh, PA

May 2030

Bachelor of Science in Statistics and Machine Learning, GPA -

- **Relevant Coursework:** Matrices and Linear Transformations, Concepts of Mathematics, Methods in Statistics and Data Science

TECHNICAL SKILLS

- Proficient in Python, R, Java, LaTeX with experience in SQL
- Fluent in English and Portuguese with working proficiency in Spanish
- Certifications: Genomic Data Science from Johns Hopkins University and Oracle Certified Associate Java SE 8

EXPERIENCE

ScottyLab, Carnegie Mellon University, Pittsburgh, PA

July 2026 – Present

Tech Member

- Worked on CMU Housing and now working on CMU Cal
- Utilized TypeScript, HTML and CSS to create reusable and sustainable components to optimize storage and workflow

Cleveland Clinic, Mata Lab, Cleveland, OH

October 2025 – May 2026

Data Science Intern

- Utilized Pandas and NumPy python libraries in Jupyter notebooks to develop quality-control pipelines for REDCAP data
- Optimized the data by removing invalid results, duplicate data and irrelevant data, resulting in a dataset that was 10% more compact and usable
- Worked in conjunction with researchers to create data that could be used for Genome-Wide Associative Studies

Case Western Reserve University, Wang Lab, Cleveland, OH

May 2025 – October 2025

Data Science Intern

- Worked on a spatial transcriptomics project involving colorectal cancer and liver metastasis
- Analyzed samples comprising more than 1k+ cells performing preprocessing, normalization, and differential expression analysis in R and Python.

PROJECTS

- [Gut Dysbiosis Analysis](#) - Processed and analyzed single-cell RNA sequencing datasets from GEO using R (Seurat, tidyverse, ggplot2). Performed clustering and dimensionality reduction (PCA & UMAP) to identify cell populations. Quantified condition-specific cluster proportions and gene expression changes associated with gut dysbiosis.
- [Internet Usage and Political Stability Analysis](#) - Analyzed global internet usage patterns using World Bank data with Python (pandas, scikit-learn, statsmodels). Applied ANOVA and linear regression to examine relationships between income group, political stability, and internet adoption. Built a random forest regression model to predict internet penetration using GDP and political stability as key predictors.

LEADERSHIP

Moonshot Robotics, Gilmour Academy, Cleveland, OH

August 2024 – May 2026

Software Captain

- Led and developed a 5-member software team in designing competition robot systems during tenure
- Won 5+ team awards during tenure and led team to first qualification to states ever
